SmartLink V3

The ultimate in remote spa control

Worldwide Remote Access

Control and configure your spa remotely from anywhere in the world.

Swift, Simple Setup Process

Extremely quick and simple setup process via Bluetooth.

Strong Signal Reception

Increased signal strength for stable connectivity on weaker signals. BSSID support for mesh networks.

Global Remote Tech Support

Allows you to request remote technical support across the globe without a technician site visit.

Retrofit to any SV Control

Universal compatibility with all model SV controllers (SV2/SV3/SV4/SV Mini 1 & 2). Bring modern convenience to your existing spa setup.

Home Automation via MQTT

Enter the world of Internet of Things by linking your spa to Home Assistant or alternative platform via MQTT.

Command your spa while lounging on your couch, driving home after a tough day, stepping straight out of the gym, or wherever you find yourself.

V3

Unleash the power of remote spa management with the SmartLink app, available on both App Store and Google Play. No matter where you are in the world, whether you're lounging on a beach or stuck in an office, your spa is just a tap away. Imagine adjusting your spa settings while you're at work, so it's ready the moment you step through the door. Or being away on holiday and ensuring your spa doesn't consume unnecessary power. It means power control, wherever you are.

Comprehensive Spa Configuration

The SmartLink app's intuitive touch screen menus offer total command over all your spa settings. Modify the operating mode to suit your lifestyle, set the filtration time for crystal clear water, or program sleep timers for energy-efficient operation. It's like a spa concierge in your pocket.

Automate with Home Assistant

Enter the world of the Internet of Things by linking your spa to Home Assistant via MQTT. Control your spa's power consumption to only occur during peak solar panel production or when discounted electricity tariffs are available. Setup powerful automations to ensure your spa is on and ready when you are.

Stay Informed with Push Notifications

Keep your spa experience stress-free with real-time updates sent directly to your phone. The SmartLink app ensures that you're always informed about your spa's status, even when you're not using the app.

Seamless Compatibility with SV Controllers

The SpaLink system is designed for universal compatibility with all SV controller models (SV2/SV3/SV4/SV Mini 1 & 2). It's easy and quick installation process makes it a perfect retrofit option, bringing modern convenience to your existing spa setup—without the hassle.
